OVERVIEW	
Business Unit	SalMar ASA
Site	Borvika
ASC status	Certified, ASC-DNV-00948
1st certification date	09.11.2023
Start of onsite production cycle	21.10.2022, start of the 2022 generation
Report last updated	30.05.2024
Wildlife interactions – Birds	40
Wildlife interactions – Mammals	1
Estimated unexplained loss (EUL) ¹	-
Suspicion of unidentifiable transmissible agent	-
Detection of an OIE ² -notifiable disease	-
Treatments	On oral treatment for sea lice using Slice (emamectin benzoate) 10.12.-17.12.2022 and one bath treatment for sea lice on some of the cages using Salmosan (Azametifos) 29.12.2023 – 04.01.2024.
Number of escaped fish	0

WILDLIFE INTERACTIONS			
BIRDS –LETHAL INCIDENTS			
Date	#	Species	Cause
11.09.2023	40	Gråmåse, Herring gull (Larus argentatus)	During delousing, the roof net was partly removed from a cage when the weather rapidly got bad so fast that reinstalling the roof net was not possible. When the feeding was restarted, many herring gulls was caught in the roof net that was only partly in place on the cage. It cannot be ruled out that the herring gulls could be affected by the ongoing bird flu pandemic in the area, causing them to try to find easily accessible food. It may also partly explain the large number of dead birds as result of the incident.
Total Birds	40		
MAMMAL - LETHAL INCIDENTS			
Date	#	Species	Cause
11.05.2023	1	Vågehval (Minke whale, Balaenoptera acutorostrata)	The whale got into a cage, and the Directorate of Fisheries decided that the whale had to be euthanized.

¹ Calculated at the end of the production cycle as: EUL= Stocking count – harvest count – mortalities – other known escapes.

² OIE is the World organisation for Animal Health.

Total Mammals	41
