| OVERVIEW   |   |
|--|---|
| Business Unit  | SalMar ASA  |
| Site   | Hovdenakken   |
| ASC status   | Certified, <a href="#">ASC00987</a>   |
| 1st certification date                               | 07.12.2016  |
| Start of onsite production cycle                     | 19.05.2024, start of the 2024 generation.   |
| Report last updated                                  | 02.07.2024  |
| Wildlife interactions – Birds                        | 0   |
| Wildlife interactions – Mammals                      | -   |
| Estimated unexplained loss (EUL) <sup>1</sup>        | Positive deviation of 8 760 fish, 1,15% for the 2022 generation, harvest completed on 05.12.2023. |
| Suspicious of unidentifiable transmissible agent     | -   |
| Detection of an OIE <sup>2</sup> -notifiable disease | -   |
| Number of escaped fish                               | -   |
| Treatments   | -   |

| WILDLIFE INTERACTIONS      |          |         |       |
|----------------------------|----------|---------|-------|
| BIRDS – LETHAL INCIDENTS   |          |         |       |
| Date                       | #        | Species | Cause |
|                            |          |         |       |
|                            |          |         |       |
|                            |          |         |       |
|                            |          |         |       |
| <b>Total Birds</b>         | <b>0</b> |         |       |
| MAMMALS – LETHAL INCIDENTS |          |         |       |
| Date                       | #        | Species | Cause |
|                            |          |         |       |
|                            |          |         |       |
|                            |          |         |       |
|                            |          |         |       |
| <b>Total Mammals</b>       | <b>0</b> |         |       |

<sup>1</sup> Calculated at the end of the production cycle as: EUL= Stocking count – harvest count – mortalities – other known escapes.

<sup>2</sup> OIE is the World organisation for Animal Health.
